Handy Diary

Version 5.0

Introduction

This is a password protected and data encrypted personal diary for Palm OS handheld PDAs.
With it, you can keep daily thoughts in your handheld.

Features:

1. Password protected and data encrypted.
2. Sorting capability by Date and Title
3. With Index function
4. Changeable Table Color
5. With Emotional Icons and Sketch Pad.

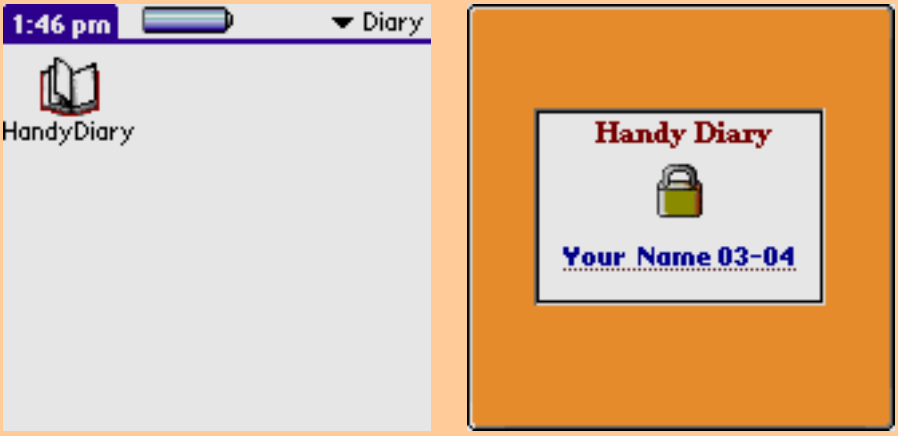

Installation

Minimum requirement**: Palm OS® 3.5 and above.**

Unzip the zip file and Install the PRC file: **HandyDiaryTrial.prc** into your Palm followed by a hotsync.

Getting Start

After the installation, tap on the "HandyDiary" icon to launch the program. You will see the pictures below:

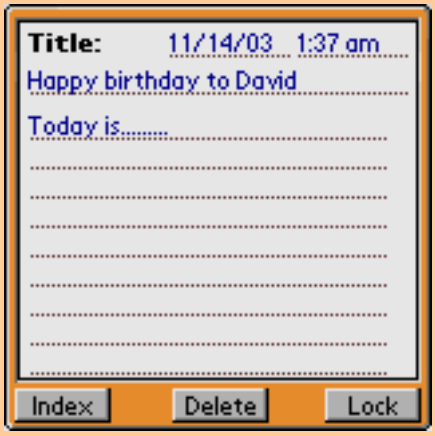

You can write your name below the "lock" picture. Tap on the "lock" to enter the index. A measage dialog asking for password will appear. For the first time, this password will be empty, just tap the "OK" button.

After that, you will see a index table as below::

To create a new page, just tap on the "New" button. The date and time will be created automatically. However, you can chnage the date and time by tapping on it.

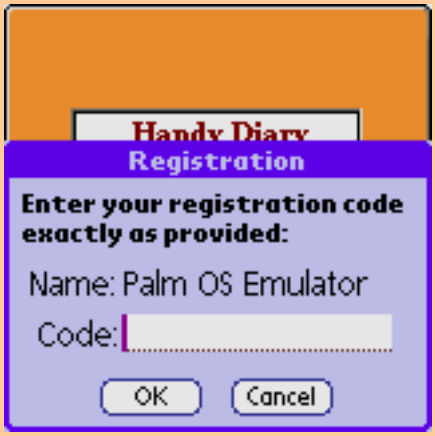

After completed your writing, tap on the "Index" button to exit or "Lock" button to lock your diary. You can edit the content by tapping on the record from the Index.

To register the software program, from the main menu, just tap on the menu button on the graffiti area as shown below, select the "Register", you will see the Name and Code. The Name is actually your Palm's Hotsync ID.
