Version 1.1

MemoryAccess™

Memory and Alerts

Memory and alert expansion for your Handspring™ handheld

- Bright LED flashing alert is visible even in daylight

- Powerful vibrating alert can easily be felt even when in a pocket

- 2-Megabyte or 8-Megabyte** Flash memory is rugged, reliable and stores applicatins indefinitely even when removed from the Springboard™ slot

- Available in all Visor™ colors

- Open platform design along with a published API supports rapid development of third-party applications

- Great for game developers; add physical report to game play; shakes, thumps, flashes and more will bring games alive

- Improved accessibility for those that can benefit from it

- Low-cost OTP or Mask ROM version available on an OEM basis

- Comes with File Mover built in so you can copy, move, backup and delete applications and data

- Features Silent Sentry software that allows alerts from your Data Book, To Do List and other application to be sent silently as a vibration or flashing LED pattern

* Minimum quantity order of 2,500 units; set-up charges may apply
