AnotherBottle

Last modified on the 20-th of June, 2002 г.

Table of contents:

General information

We offer you a new game for Palm OS devices! It is called AnotherBottle. It has two versions: for devices with color screen and for devices with black and white screen. AnotherBottle is an easy but very exiting and funny game. You will never give up this game.

Demo-version limitations:
The demo version provides for 20 minutes of playing. After expiring, you will need to enter a serial number to continue playing.

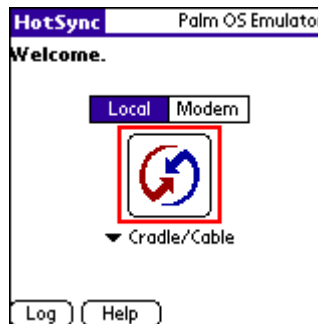

Having entered a serial number, you will be able to continue playing.
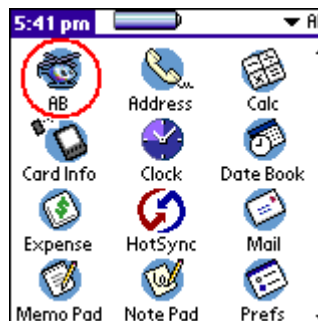

Installation

1. Run the Palm Desktop program on your desktop computer (the Palm Desktop icon is on the desktop). Then click the Install Tool icon in the Palm Desktop window.

2. In the appeared window add the AnotherBottle_Color.prc file (if you have a device with color screen) or the AnotherBottle_Gray.prc file (if you have a device with black and white screen). To add a file into the Install Tool window you should drag-&-drop the file there or press the Add button and set location of the file you want to add.
3. Press the Done button.
4. Synchronize your device with the desktop computer using the HotSync program. For synchronization open the application HotSync and tap the icon in the center of the screen.

After synchronization AnotherBottle will be installed.

How to play

Tap the AB icon on the application screen to enter the AnotherBottle game. You will see the splash-screen of the game:

Then you should tap the screen in any point or press any hardware button of your device to start the game. Window of the game looks like that:

The object of the game is to fly bypassing obstacles as far as possible. After start the helicopter begins to descend. You should control altitude of the helicopter to bypass obstacles. To maintain altitude you should press & hold any hardware button of your device. You should keep the button pressed until the helicopter is at the altitude you wish. You can also use JogDial (hold it pressed) to control the altitude if your device has a JogDial. As soon as you release the button the helicopter will descend again.
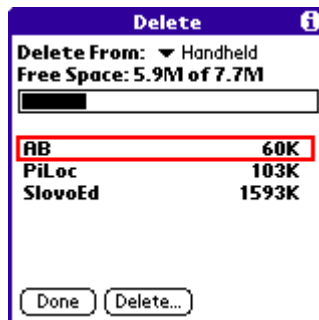

Attention! If you have a device with high resolution, you should first switch off high resolution for the AnotherBottle game. To do it you should open Preferences > HiRes, then put a tick near the AnotherBottle game string.

In the right bottom corner of the screen you can see how many meters you have already flown.

Good luck!
Don't drink too much if you are a pilot of helicopter!

Uninstallation

To uninstall AnotherBottle from your device tap Application > Menu > Delete. Then choose the AB line and tap the Delete button.

Customer support service

If you have any questions concerning AnotherBottle or other games made by Paragon Software (SHDD) contact our customer support service:
911@penreader.com

SlovoEd dictionaries
SlovoEd is a powerful multilingual dictionary with convenient interface, context search possibility, and low memory consumption due to original compression technology. The program runs fast and effectively despite the high data compression ratio.
We offer SlovoEd engine with many dictionary databases:

English – Spanish - English	Italian – English - Italian
German – English - German	Russian – English - Russian
French – English - French	and many others (more than 50)

The national language support system PiLoc
PiLoc is a localization system for Palm OS devices. It creates an environment to operate with Palm OS in national language (national fonts, national keyboard layout, national Graffiti etc.). It supports installation of several languages simultaneously (for example, Russian and Hebrew or Finnish and Swedish): now PiLoc provides 23 localizations. PiLoc is available for such languages as:

Greek	Polish
Hebrew	Russian
